Heated towel rail

- **COMPACT, STREAMLINED DESIGN**
- **FAST HEAT DISTRIBUTION BOOSTED BY THE FAN.**

Heated towel rail

1200W: ideal for a bathroom of 4 to 8 m²:
- 500W: for regular heating
- 700W fan heater: to boost the temperature in just a few minutes.

Energy savings

Its open-window detection and daily and weekly programming mean you won't waste any energy.

Design

Large hanging capacity: 2 adjustable bars top / bottom, left / right up to 8 possible configurations to adapt to small spaces.

GENTLE HEAT IN A SPACE-SAVING FORMAT

The single-unit aluminium heating element heats up the front panel very quickly to provide a feeling of gentle, even heat throughout the room.

TEMPERATURE RISES FAST

Its integrated, discreet fan, protected by a dust filter, raises the temperature in the bathroom in just a few minutes for complete comfort when you're taking a bath.

TOWELS THAT ARE ALWAYS WARM AND DRY

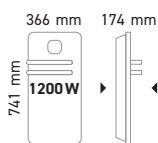

The 2 drying bars are offset to avoid overlapping towels. They can be positioned on the left or right.

EFFICIENT AND PRACTICAL THERMOSTAT

- The NOIROTH thermostat adapts to your personal needs for controlled energy consumption in the bathroom.
- Extremely easy to use with its backlit LCD screen and control dial.
- Ultra-precise electronic control
- 2-hour BOOST function.
- Dust filter saturation detection.
- Open window detection.
- 3 pre-set programmes and 3 flexible.
- Parental lock.
- Controllable by 6-core pilot wire.
